

OBJECT ORIENTED WEB PROGRAMMING USING RUBY

Day 6: 14/May/2015

Controller Design

Today's Topics

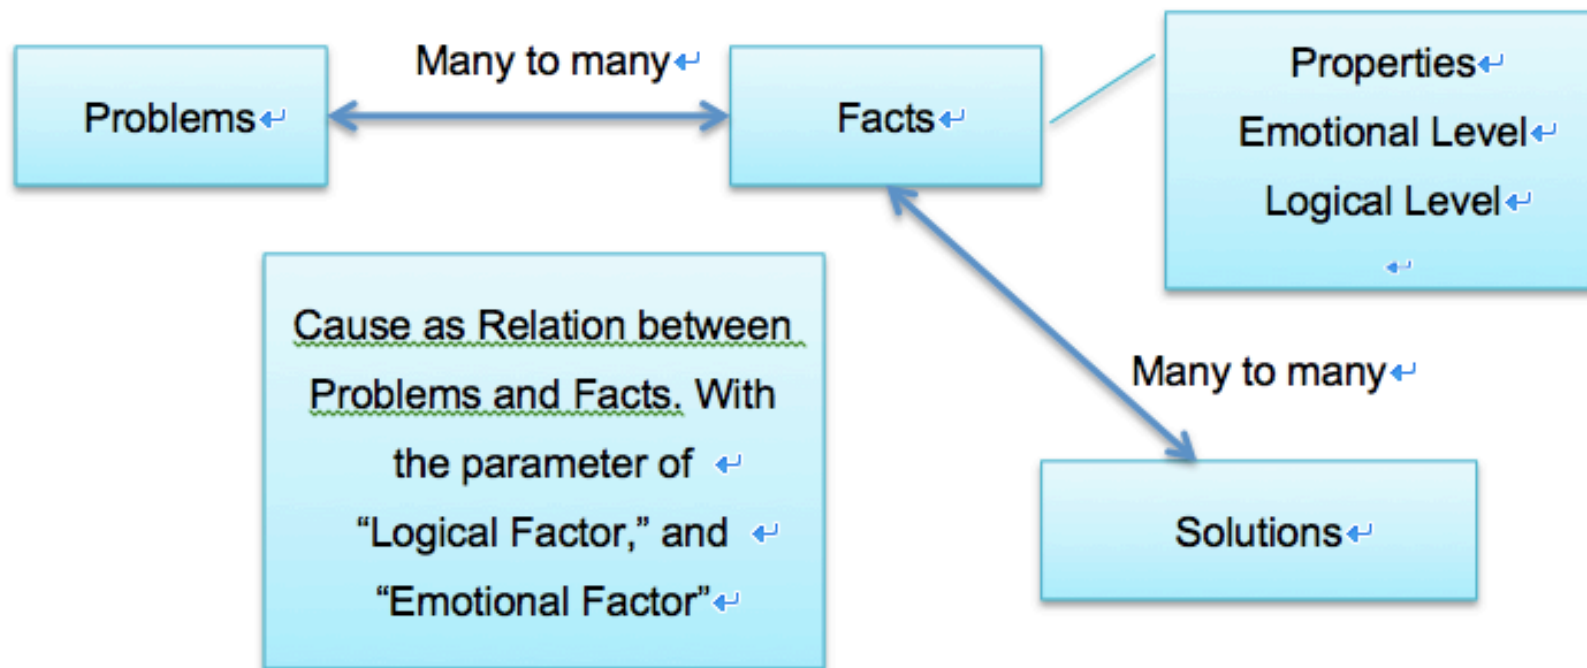

Table Design – Discussion

How to describe the “Problem,” “Fact,” and “Cause.”

Here presented one springboard design for the discussion.

Then, discuss about the screens, and controllers.

Springboard Design

Discussion

How the users access to the information,
and how to input the information?

- Screen design

What does the system do to handle those
input before storing to the system?

- Controller design.

Today's lecture

Watch the given springboard table design carefully, and image the input web forms.

Also, image the methods to handle information.

Draw the web screen, and method function ad lib, and present in the class.

If any modification is necessary, point out the design improvement.
