

Answer to my homework

- Ikuo Kobayashi -

- Why db/development.sqlite3 is not included in the git management list?

Answer

- Please see the .gitignore file in the project root.
- (I myself edited this file, and I forgot.) ^^;

.gitignore

```
[koba@cisnote ippeisoba]$ cat .gitignore
# See https://help.github.com/articles/ignoring-files for more about ignoring files.
#
# If you find yourself ignoring temporary files generated by your text editor
# or operating system, you probably want to add a global ignore instead:
#   git config --global core.excludesfile '~/.gitignore_global'
#
# Ignore bundler config.
/.bundle
#
# Ignore the default SQLite database.
/db/*.sqlite3
/db/*.sqlite3-journal
#
# Ignore all logfiles and tempfiles.
/log/*
!/log/.keep
/tmp
#
```
