# Root User in Linux

For rails environment

Create general user

- First create general user; non root user.

To know the user statuses

- Configuration is described in the files in /etc folder.
- See /etc/passwd, and /etc/group

```
[koba@cisnote Aptana_Studio_3]$ su - root
パスワード：
[root@cisnote ~]# usermod -G wheel koba
[root@cisnote ~]#
```

Add user to wheel group

- Type the command
  usermod –G wheel koba

- And then, modify /etc/sudoers

```
[koba@cisnote Aptana_Studio_3]$ su - root
パスワード:
[root@cisnote ~]# usermod -G wheel koba
[root@cisnote ~]#
```
